

LIGHTING

With all of the technological advancements over the past decade in the entertainment industry, its all too easy to get caught up in it all. Figure of Eight are specialists in making the most of technology whilst retaining the needs of any given production and working to a budget. From a simple uplighting solution for a semi permanent installation to a one stop stage lighting solution, we can deliver lighting projects on any level. We offer a whole host of services including:

- Production lighting design from concept to execution
- Equipment supply including moving lights, LED technology, dimming, control and rigging
- Lighting operators and programmers
- Custom built lighting solutions from our workshop facility
- Crew, logistics and transportation

We pride ourselves on providing the very best of service. Our equipment is maintained and prepared to the highest of standards with a routine maintenance and testing program to ensure all of our equipment is fit for purpose. Our technicians, operators and designers are some of the best in the industry with extensive experience of both temporary and permanent installations, trained in plant operation and working at height.

So whether you need a 'drop and go' service or a complete temporary power solution, please get in touch and let us show you what we can do for your next event.
