hello@figureofeighevents.co.uk

HELLO!

From roles in two Olympic Games: including London's opening ceremony and the Beijing equestrian events: and major festivals such as Glastonbury and Hay, right down to smaller low-key events, both at home and abroad; over 20 years of hands-on technical industry experience has given us a great understanding of what can be done and how to make sure customers get a great result. Through these experiences, the company that we have formed is based upon reliability, knowledge and communication: the reason, we believe, that customers repeatedly rely on us to deliver their projects on time and on budget. Our teams ability to create great solutions, guided by our customers' requirements combined with our knowledge (and not driven by what we have "on the shelf") makes us an unrivalled choice when looking for an event partner.

We look forward to hearing from you!

Lizzie & Rich Rayner

Directors

hello@figureofeightevents.co.uk

WHY US?

LIFE IS SHORT, WORK WITH AWESOME PEOPLE...

QUALITY

Great quality equipment is nearly as important as our people are to us, after all, there isn't any second chances in events!

Our kit needs to work first time, every time! For example, We manufacture all our cabling and distribution in house in order to guarantee quality and continue to improve our stringent routine maintenance program. This ensures that equipment is not only correctly manufactured, but kept in optimum condition to our exacting standards.

CONSISTENCY

In the high pressure world of events, our clients repeatedly rely on us to deliver on time and on budget! We work to our own internal quality standards regime that ensures both quality and consistency in every part of the business from how we test and sign off our installations to how we prepare every piece of equipment we own.

With both the skills and equipment to deliver time and time again, we are your dependable and reliable event partner.

FLEXIBILITY

Things change...we get it! Sometimes things go forwards, sometimes backwards. Either way, we stick with our clients to see problems through, find a solution and deliver. If you need some 'out of the box' thinking coupled with years of highly relevant experience...let's do this!

TYPE 1 DISTRO

INPUT	32A SPNE
OUTPUTS	4x 16A SPNE, 1x 32A SPNE LOOP THROUGH
INCOMING CIRCUIT PROTECTION	30mA DP RCBO (ALSO PROTECTS 32A OUTPUT)
OUTGOING CIRCUIT PROTECTION	4x 16A 1P MCB
OTHER	NONE

TYPE 2 DISTRO

INPUT	32A TPNE
OUTPUTS	2x 16A SPNE, 2x 32A SPNE, 32A TPNE LOOP
INCOMING CIRCUIT PROTECTION	NONE
OUTGOING CIRCUIT PROTECTION	2x 16A DP 30mA RCBO, 2x 32A DP 30mA RCBO,
OTHER	NONE

TYPE 3 DISTRO

INPUT	32A TPNE
OUTPUTS	9x 16A SPNE, 32A TPNE LOOP
INCOMING CIRCUIT PROTECTION	32A 4P MCB (ALSO PROTECTS LOOP)
OUTGOING CIRCUIT PROTECTION	9x 16A DP 30mA RCBO
OTHER	M8 EARTH STUD, NEON INDICATORS

TYPE 4 DISTRO

INPUT	32A TPNE
OUTPUTS	6x 16A SPNE, 3x 32A SPNE, 32A TPNE LOOP
INCOMING CIRCUIT PROTECTION	32A 4P MCB (ALSO PROTECTS LOOP)
OUTGOING CIRCUIT PROTECTION	9x 16A DP 30mA RCBO, 3x 32A DP 30mA RCBO
OTHER	M8 EARTH STUD, NEON INDICATORS

SIGNED, SEALED...AND NEARLY DELIVERED!

We can provide a number of innovative transport solutions as part of our service using our fleet of in house vehicles. Our Mercedes Sprinter box van boasts 2m+ internal height making it ideal for bulky items such as truss, whilst our range of 4x4's fitted with off road tyres are the perfect partner for our range of trailers and generators, meaning we can get equipment into a whole host of difficult sites. We also provide an engineer standby and callout service using our dedicated and well equipped service vehicle.

PACKAGING

We understand the need to package kit correctly, we spend huge sums of money doing so! All technical hire equipment is either flight cased, racked or provided in protective casing whilst our cabling trunks work within standard box trucks widths to optimise space. Our modular electrical distribution equipment is pallet friendly and we utilise super tough plastic pallet boxes for cabling which not only allows stacking in transit but is suitable for the pallet delivery network.

WIDE LOAD!

We offer dedicated heavy goods vehicles for larger deliveries and collections. Ranging from cranes to flat beds, urban trailers to curtain sided vehicles, there are many options available depending on your requirements. Utilising HGV cranes and our compact tele handler, we can easily cross load equipment on to our range of smaller vehicles to access difficult sites. Please let us know your needs and we will gladly provide you with a cost for the most suitable solution.

PALLET NETWORK

Need equipment next day? No problem!

From point of enquiry to equipment landing onsite, we move fast! We have a strong and reliable relationship with our pallet network courier giving us the option to either get palletised equipment to site next day or more cost effectively on an economy service. With either option, we can stack multiple pallet boxes together optimising value for money.

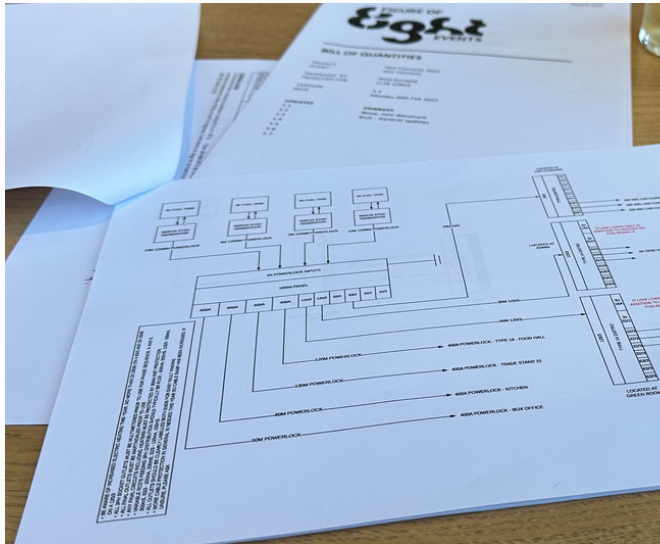

TECHNICAL SUPPORT

DESIGN

If you need support and guidance, we can help! With over 20 years experience, we take event design in our stride.

From initial mood boards and visuals to fully fledged CAD designs and drawings, we can both partially or fully assist in making your vision a reality! In addition to this we can also ensure all relevant legislation and regulations are adhered to whether it be structural, electrical or a combination of both.

INSTALLATION

Whether you need an incognito technician on a B2B basis or a full team you can trust, our strength really is in our people. Our reputation for being great to work with allows us to attract and employ some of the most skilled, communicative and friendly individuals within the industry. As a one stop technical provider, we rely on multi skilled technicians which allows us to achieve more variety of services from one core crew. If you need technicians of any type, from electricians to staging hands, radio mic technicians to fencing crew, please get in touch.

CERTIFICATION

We provide testing both internally and externally to ensure our installations are not only meeting but exceeding standards. As we build all of our electrical distribution in house, we are able to specify and build to our own exacting standards with no compromise. Amongst other benefits, this allows for a greater degree of cascading electrical protection which combined with our BS7909 onsite testing regime and regular independent external testing makes for a truly reliable service.
